

## Information for completing the device quote template

The templates below provide examples on what is required to be entered on the device quotes.

The **Government Subsidy** amount advises the client of the amount the Australian Government contributes towards their device and its maintenance. This does not include the fitting fee paid to the provider.

The **Cost to Client** fields should only include amounts the client is responsible for paying.

Providers can adapt the device quote template and delete lines that are not required on individual quotes.
